ALEXANDR PANFILOV

Frontend Developer

I have been in the industry for ten years as a freelance web developer. I have a keen eye for detail and most of my working life has been dedicated to building various websites for clients.

Last year I was actively studying front-end development using Javascript/Typescript, React.js and other popular technologies & tools.

Looking for an entry-level position as front-end developer. I have a great desire to develop my skills and experience in this area of work.
